

GLOBAL MARINE ENGINEER		CROSS-FUNCTIONAL LEADER	DIGITAL ENABLER	OPERATIONAL EXCELLENCE
INDUSTRY EXPERIENCE				60 MONTHS (FULL-TIME)
Full Time	AG MARITIME PVT. LTD		THIRD ENGINEERING OFFICER	May`23 - Jul`24
	AG MARITIME PVT. LTD.		FOURTH ENGINEERING OFFICER	Jul`22 - Feb`23
	AG MARITIME PVT. LTD.		JUNIOR ENGINEER	Jul`21 - Feb`22
	AG MARITIME PVT. LTD		ENGINE CADET	May`18 - Jan`21
	Digital Transformation	• Implemented SMMS ERP onboard, standardizing procurement & maintenance workflows as PoC for org • Institutionalized reporting governance through VEMS , aligning ship–shore teams on asset management • Built Power BI dashboards tracking asset health , KPIs and usage trends to enable data driven decisions • Drove digital adoption by aligning engg, operations & shore teams via std reports, training & governance		
	Supply Chain & Logistics	• Optimized \$500,000+ spares inventory ROL , cutting holding costs while ensuring 99% asset availability • Aligned Port Logistics and Bunkering ops. with charter agreements, minimizing TAT and demurrage risks • Optimized MARPOL -compliant waste disposal routes, cutting costs & ensuring zero regulatory bottlenecks		
	Operational Excellence	• Solved fuel overspending by designing procurement & storage plan , improving budget utilization by 15% • Built a business case for innovative waste mgmt. by reviving sludge incineration practices, reducing costly shore disposals and man-hour inefficiencies, delivering \$10K savings, & securing accelerated promotion • Reduced critical asset failures by 30% by tactically enhancing MTBF through lifecycle analytics assessment		
	Project & Stakeholder Management	• Spearheaded team of 7+, achieving 100% task compliance and minimizing downtime across 12+ voyages • Enhanced role adoption of 100+ recruits through structured onboarding as part of the induction team • Directed multinational crew in cross-functional ops , enhancing collaboration & reducing execution gaps • Applied Business Process Model with Deck team, eliminating 70% of rest-hour breaches within a month		
	Compliance & Risk Management	• Created standardized SOP for Polar voyages , minimizing fuel degradation by 30% in the arctic conditions • Implemented EEXI & SEEMP measures, aligning ops with the decarbonization mandates & ESG readiness • Enabled zero regulatory fines & delays by ensuring BWMS retrofit , through end-to-end ESG compliance		
	Cost Optimization	• Cut annual emergency purchase costs by \$50,000 through SMMS migration and hands-on crew training • Reduced fuel use by 3% by spotting shop trial deviations and leading YY analysis of purifier performance		
Process Improvement	• Validated 30% fuel savings, 37% CO ₂ reduction by developing feasibility report for the WindWings® pilot • Unified bunker SOPs across Deck and Engine, standardizing process & reducing turnaround time by 20% • Redesigned store layout using 5S framework , improving space utilization & material accessibility by 20% • Slashed drydock turnaround time by 2 days, saving \$15k, via scope governance & stakeholder alignment
